WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 18, 2025

Flooding Outlook

Gulf Coast

- Risk of dangerous flooding continues along the Gulf Coast from a no-name storm system that could lead to days of enhanced flood risk.
- Communities between New Orleans and the Texas-Louisiana border could see an additional 2–4 inches of rainfall, with locally heavier amounts.
- Computer forecast models show a widespread swath of 1-3 inches of rainfall from east of Houston to Panama City, Florida, with amounts of 5-8 inches and even greater around Lafayette, Louisiana.
- Flood Watches remain in effect along the I-10 corridor, as some rainfall rates could approach 1–2 inches per hour, which is enough to overwhelm drainage systems.
- Flood Watches have also been issued for parts of the Tennessee and Ohio valleys.
- Forecast models show the moisture and circulation within the disturbance meandering over the Southeast because of a building ridge over the northern U.S., essentially blocking its exit.
- This could send the disturbance back over the southwest Atlantic and northern Gulf - the same waters where it originated for a second chance of organization.

Pending Individual Assistance Declaration Request

| State | Event | Date Submitted | Approved/Denied/Pending | Number of Counties/Tribes |
|-------|--|----------------|-------------------------|---------------------------|
| MI* | Severe Winter Storm | 5/16/2025 | Pending | 11 Counties |
| OR | Severe Storms, Flooding, Landslides, Mudslides | 5/19/2025 | Pending | 3 Counties |
| IN* | Severe Storms, Straight-line Winds, Tornadoes, and Flooding | 5/28/2025 | Pending | 6 Counties |
| WV* | Severe Storms, Straight-line Winds, Landslides, and Flooding | 6/20/2025 | Pending | 2 Counties |
| NM* | Severe Storms, Flooding, and Landslides | 7/8/2025 | Pending | 2 Counties |

*Award of task order to contractor pending
