WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 9, 2026

Flash Flood Threat

Central U.S.

- Over 15 million people across Ohio Valley, Tennessee Valley, and Southern Appalachians remain under flood alerts Tuesday as heavy downpours continue to put communities at risk.
- This includes major cities such as Louisville, Kentucky; Nashville, Tennessee; and Atlanta, Georgia.
- The relentless storms have already dumped 5 to 8 inches of rain across parts of the Central U.S. and South since this weekend, triggering life-threatening flash floods and multiple water rescues, particularly in more rural areas.
- A weaker system is forecast to move out of the Great Lakes region today.
- Flood watches stretch from Georgia to Kentucky today, with incoming storms capable of dropping 2 to 3 inches of torrential rain hourly.
- Tuesday morning, forecasts indicate higher rainfall totals across portions of western Kentucky and Tennessee, where rain will likely still be ongoing.
- During the afternoon, rainfall rates could exceed 2 inches per hour, quickly leading to flash flooding.

Tropical Activity - Pacific

Tropical Depression Boris

- Tropical Storm Boris weakened into a tropical depression as it moved farther inland over southern Mexico, roughly 15 miles east-northeast of Punta Maldonado.
- Maximum sustained wind speeds of 35 mph and is moving north-northwest at 6 mph.
- Boris became a Tropical Storm in the Eastern Pacific early Monday, developing from Tropical Depression Two-E.
- Tropical Storm Warnings have been dropped along the Mexican coast.
- The NHC said Boris could still produce flash flooding and an additional 1 to 4 inches of rain across the Mexican states of Guerrero and Oaxaca, before dissipating this afternoon.

Tropical Storm Cristina

- Cristina strengthened from Tropical Depression Three-E and was named Monday afternoon.
- Maximum sustained winds of 40 mph and is moving north-northeast at 3 mph.
- It is currently about 95 miles west-northwest of Managua, Nicaragua, and is expected to meander along the Central American coast through the week before gradually making a turning northwestward towards the open Pacific.
- Cristina could bring heavy rain and life-threatening flash flooding to Costa Rica, Nicaragua, Honduras, El Salvador and Guatemala through mid-week. Both Nicaragua and El Salvador have issued Tropical Storm Warnings.
