WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

## Tropical Activity – Atlantic

### Disturbance 1

- Located well ESE of Bermuda moving WNW.
- Conditions are forecast to become more conducive for development in a few days.
- A tropical depression could form late this week.
- Formation chance through 48 hours: Low (near 0%); 7 days: Med (40%)

## Tropical Activity – Eastern & Central Pacific

### Tropical Depression Norbert

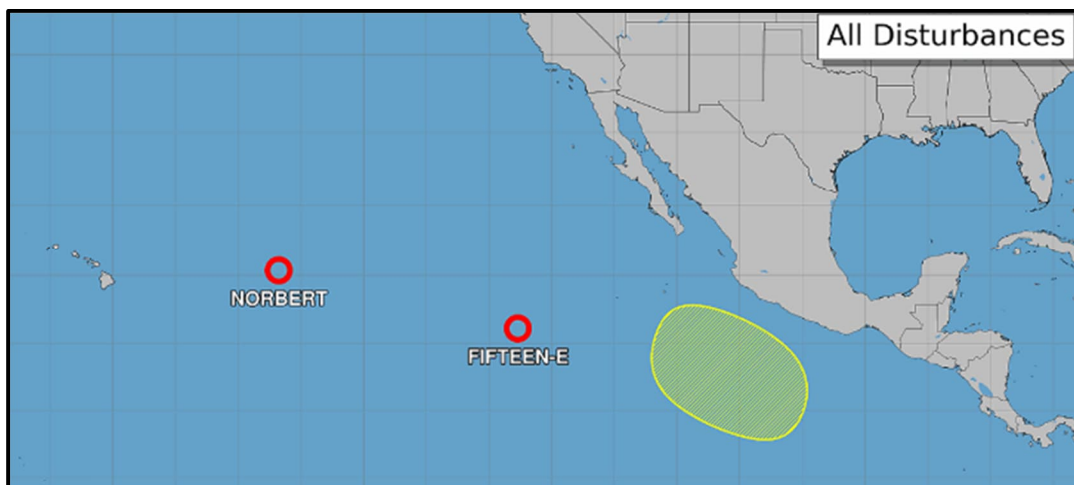

- Located 870 miles E of Hilo, HI moving W at 14 mph.
- Maximum sustained winds of 35 mph.
- Continued gradual weakening is forecast and Norbert is expected to become a post tropical remnant low tomorrow morning.

### Tropical Depression Fifteen-E

- Located 950 miles WSW of the southern tip of Baja, California moving W at 10 mph.
- Maximum sustained winds of 35 mph.
- Little change in strength is forecast during the next couple of days.

### Disturbance 1

- Located well S of southwestern Mexico moving WNW at 10 mph.
- Conditions appear conducive for some development over the weekend.
- Formation chance – 48-hour: Low (near 0%); 7-day: Low (30%)

WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

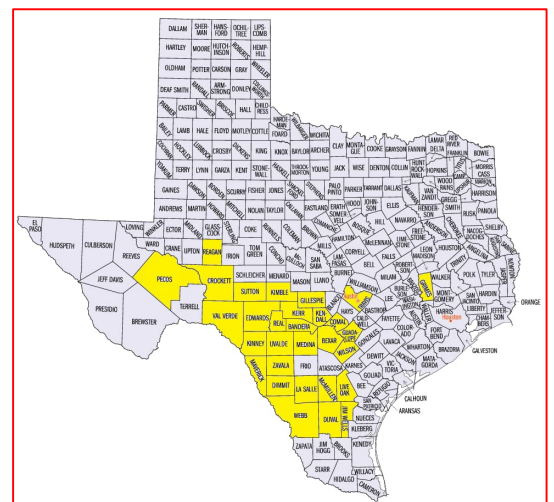

## Pending Individual Assistance Declaration Requests Kentucky

- Kentucky experienced multiple rounds of severe weather from June 17–30, 2026, including damaging winds, tornado-producing thunderstorms, torrential rainfall, flash flooding, and localized landslide and mudslide conditions.
- The most significant flooding developed beginning June 27, when several inches of rain fell across central and south-central Kentucky, causing rapid rises on creeks, rivers, and streams.
- The disaster resulted in six fatalities statewide, including three in Madison County and one each in Hardin, Jackson, and Jefferson Counties. Many residents were displaced or experienced restricted access to their homes.
- Madison County was identified by state officials as one of the most heavily impacted areas, with extensive residential flooding, infrastructure damage, evacuations, and service disruptions. Cumberland County also experienced significant residential damage.
- On July 23, 2026, Governor Beshear requested a federal Major Disaster Declaration that included Individual Assistance for fourteen counties: Bullitt, Clinton, Cumberland, Garrard, Grayson, Jackson, Jessamine, Jefferson, Madison, Meade, Mercer, Metcalfe, Spencer, and Wayne.
- On July 27, 2026, WSP responded to a proposal request for this event. We are waiting for FEMA's decision award.

## Texas

- Beginning July 12, 2026, a prolonged severe-weather pattern produced severe storms, tornadoes, flash flooding, and river flooding across South Central and Southwest Texas.
- Concentrated damages in Kerr/Kerrville, Uvalde, La Salle/Cotulla, and portions of Bexar County.
- Kerr County/Kerrville: Reported impacts include hundreds of damaged homes, with local reporting identifying approximately 655 damaged homes and additional reports of destroyed or heavily damaged residences, including substantial flood-damage reports within Kerrville city limits.
- Uvalde County and La Salle/Cotulla: Uvalde experienced major Nueces River flooding, home inundation, damaged residential systems, evacuations, and roadway impacts, with reports indicating residential structures and manufactured homes were affected in low-lying areas. Farther downstream, Cotulla and surrounding La Salle County neighborhoods experienced

# DAILY DART

## WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

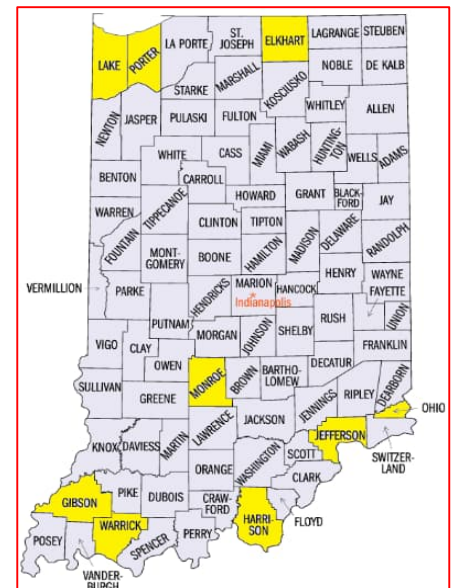

September 15, 2026

continued flooding, residual inaccessibility, and reported residential damage, which may delay applicant outreach, inspection scheduling, and damage validation.

- Bexar County: The July 15 tornado activity in northwest San Antonio and other parts of Bexar County created localized wind and structural damage to apartments, homes, nearby commercial properties, trees, roofs, and debris fields. Reported damage included damaged apartment units and residential properties.
- On July 24, Governor Abbott directed TDEM to request FEMA Individual Assistance eligibility for 30 counties, including Bandera, Bexar, Comal, Crockett, Dimmit, Duval, Edwards, Gillespie, Guadalupe, Grimes, Jim Wells, Kendall, Kerr, Kimble, Kinney, La Salle, Live Oak, Maverick, McMullen, Medina, Pecos, Reagan, Real, Sutton, Travis, Uvalde, Val Verde, Webb, Wilson, and Zavala.
- On August 12, 2026, WSP responded to a proposal request for this event. We are waiting for FEMA's decision award.

### Indiana

- From June 6 through June 26, 2026, Indiana experienced a prolonged and complex severe weather event involving repeated rounds of thunderstorms, tornadoes, damaging straight-line winds, flooding, downed trees and power lines, and widespread residential impacts.
- The event produced record-setting tornado activity, including 58 June tornadoes statewide and 27 tornadoes on June 11 alone.
- Governor Mike Braun issued a state disaster emergency on June 19 for 63 counties due to flooding, severe weather, tornado activity, and a derecho.
- Elkhart County represents the largest publicly quantified concentration of residential damage, with local emergency management reporting more than 600 damaged homes and providing specific destroyed, major, minor, and affected counts.
- Lake County/Merrillville represents another concentrated damage area, with more than 200 displaced residents initially assisted and 222 Red Cross cases later opened in connection with the June 11 tornado. Merrillville and Warrick reporting also documented apartment-complex damage and renter displacement.
- Monroe and Gibson sources documented impacts to mobile and manufactured housing.
- Ohio County documentation identified a destroyed house, garages, and outbuildings.
- Harrison County sources documented flooded homes.
- Porter County adds severe EF-3 corridor damage, including a demolished one-story home and multiple damaged or destroyed homes reported in the Hebron/Kouts area.
- On August 6, Governor Mike Braun requested Individual Assistance for nine counties.
- On August 13, 2026, WSP responded to a proposal request for this event. We are waiting for FEMA's decision award.

## WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

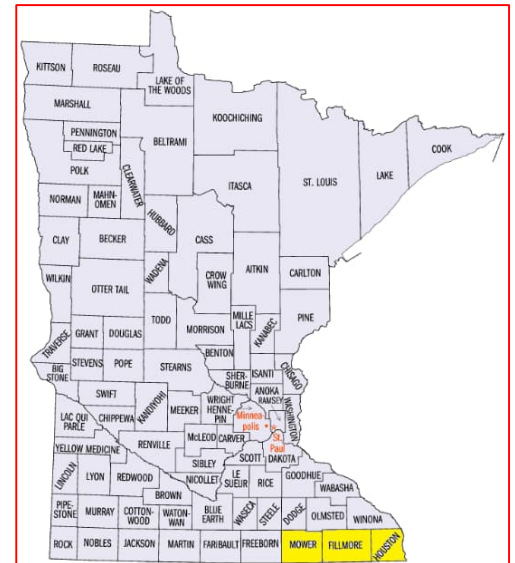

## Guam – Typhoon Bavi

- Super Typhoon Bavi affected Guam and portions of the western Pacific in July 2026, bringing heavy rainfall, damaging winds, hazardous coastal conditions, and elevated risks to residents, housing, infrastructure, and essential services.
- Bavi produced torrential rainfall, hurricane-force winds, and at least four reported injuries in Guam; northern Guam experienced Category 1–2 conditions during the storm’s passage.
- Guam conducted an IA JPDA from July 28–31 with FEMA IA, SBA, and village mayor representatives to validate housing damage and support the request for federal assistance.
- By August 14, Gov. Lou Leon Guerrero had requested a major disaster declaration following coordinated territorial, local, nonprofit, FEMA, and SBA assessment activity.
- On August 14, 2026, WSP responded to a proposal request for this event. We are waiting for FEMA’s decision award.

## Minnesota

- Minnesota experienced two major rounds of severe weather during July 2–8, with the most significant impacts concentrated in southeastern Minnesota.
- Starting with extreme rainfall and flash flooding, followed by a July 6 severe-weather outbreak in northwestern/west-central Minnesota that included tornadoes, damaging winds and hail.
- Rainfall exceeded 6 inches across more than 1,000 square miles. Some locations received 8+ inches in roughly a 24-hour period.
- The flooding was particularly severe in Fillmore and Houston counties, where numerous streams rapidly overflowed. Mower County also experienced significant flash flooding, including water rescues at a campground.
- Houston County experienced particularly significant community impacts. Spring Grove reportedly received approximately 11 inches, overwhelming the storm sewer system.
- Fillmore County was one of the areas most heavily affected by the July 2 extreme rainfall. About 75% of the county's area received at least 6 inches of rain, with some locations receiving substantially more. Wykoff recorded about 5.7 inches, while Lanesboro and Harmony received nearly 5 inches during the initial event.
- On August 21, 2026, Governor Walz requested individual assistance for the counties of Fillmore, Houston and Mower.

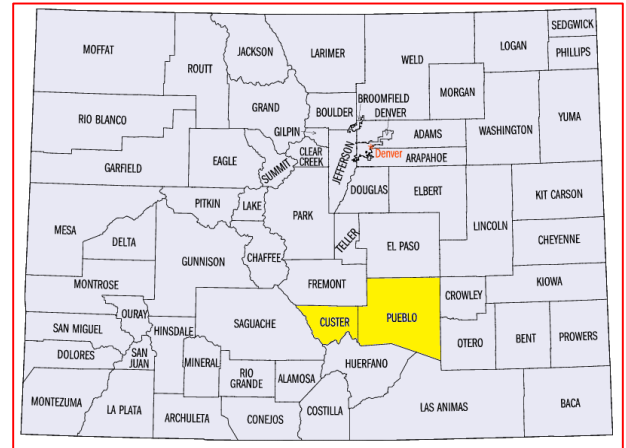

## WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

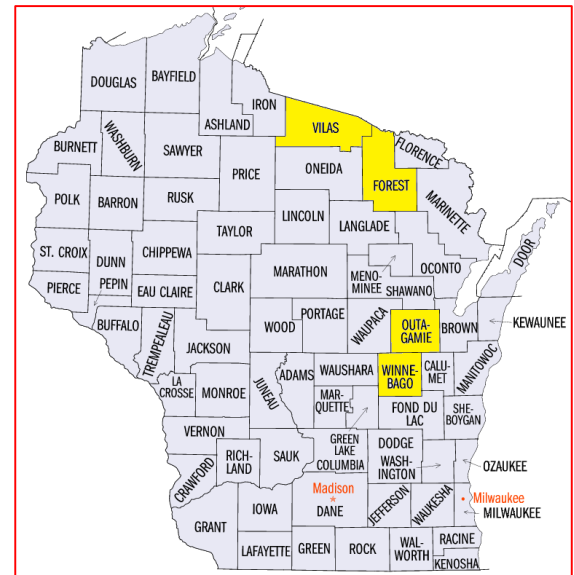

## Colorado

- On August 23, 2026, Gov. Jared Polis requested a Major Disaster Declaration from President Trump and the Federal Emergency Management Agency after two different large-scale wildfires destroyed hundreds of homes and disrupted local economies this summer.
- The Aspen Acres Fire burned more than 100,000 acres in southern Colorado and the Gold Mountain Fire near Ouray in western Colorado burned nearly 40,000 acres.
- Firefighters are still working to get full containment on both fires, and flooding is now a problem in and around both burn scars. Earlier this month, a man died in the Aspen Acres burn area when he was swept away in floodwaters.
- The request seeks individual assistance for Pueblo and Custer counties after the two fires burned more than 140,000 acres, destroyed 324 homes, damaged critical infrastructure and forced the evacuation of about 11,600 residents.

# Wisconsin

- Severe thunderstorms affected portions of Wisconsin on Monday, July 27, 2026.
- This supercell eventually moved into the Fox Cities, producing an EF3 rated tornado that tracked from Appleton to Menasha, before dissipating over Lake Winnebago. The tornado was on the ground from 11:56 a.m. to 12:22 p.m. for 12.4 miles.
- During this time, additional thunderstorms developed across southern and southeastern Wisconsin. These storms produced multiple reports of large hail and several reports of wind damage across the southeastern portion of the state during the evening hours.
- The JPDA for Individual Assistance in four counties assessed 2,346 residential structures. Those homes had damages with varying degrees of severity: 84 structures were destroyed, 412 had major damage, 1,331 had minor damage, and 519 others were affected. The total damage costs are estimated at more than \$8.2 million.
- On August 26, 2026, Governor Tony Evers requested individual assistance for the counties of Forest, Outagamie, Vilas, and Winnebago.

## West Virginia - Appeal

- 
- A map of West Virginia showing all 50 counties. Boone and Logan counties are highlighted in yellow. Charleston is marked with a red dot. The map includes labels for all counties: Hancock, Brooke, Ohio, Marshall, Monongalia, Wetzel, Tyler, Marion, Preston, Morgan, Berkeley, Jefferson, Hampshire, Mineral, Tucker, Grant, Hardy, Randolph, Pendleton, Upshur, Barbour, Taylor, Harrison, Dodd, Ritchie, Pleasants, Wirt, Gilmer, Lewis, Mason, Jackson, Roanoke, Putnam, Cabell, Wayne, Lincoln, Kanawha, Boone, Logan, Nicholas, Fayette, Raleigh, Summers, Monroe, McDowell, Mercer, and Wyoming.

## Ohio

- [illegible]

# DAILY DART

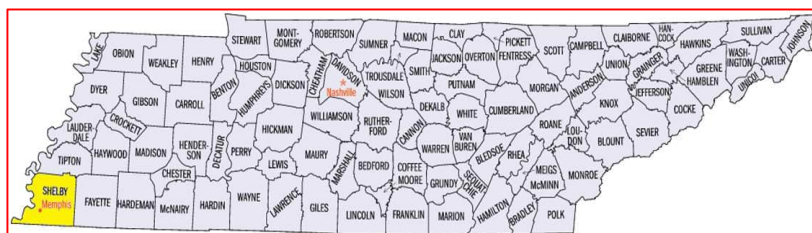

WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

- Cincinnati / Hamilton County: August flooding impacts were concentrated primarily in western Hamilton County—especially Harrison, Harrison Township, and Whitewater Township—rather than central Cincinnati.
- Columbus / Franklin County: Localized Reynoldsburg neighborhoods experienced residential basement flooding after 4–7 inches of rainfall fell across the hardest-hit areas of Franklin and Licking counties.
- At least four people were injured in the storms, two people died, and authorities made approximately 59 water rescues.
- The request covers the following 23 counties: Adams, Athens, Brown, Butler, Champaign, Clark, Clermont, Darke, Fairfield, Franklin, Greene, Hamilton, Highland, Licking, Logan, Madison, Morgan, Muskingum, Perry, Preble, Richland, Shelby, and Washington.
- On September 5, 2026, WSP responded to a proposal request for this event. We are waiting for FEMA's decision award.

## Tennessee

- On Saturday, August 22, 2026, a fast-moving bow-echo line of severe thunderstorms moved through western Tennessee, with the most severe impacts concentrated in Shelby County and the Memphis metropolitan area.
- The storm produced destructive straight-line winds generally reported in the 70 to 80 mph range, with National Weather Service and storm-reporting data also documenting severe wind reports in and around Whitehaven, Southeast Memphis, Lakeland, and Collierville.
- Although the storm moved through quickly, it caused widespread tree and utility damage, blocked roads, damaged homes and businesses, and created a prolonged power-restoration incident across the county.
- Memphis Light, Gas and Water reported that more than 140,000 customers were impacted by outages, while TEMA reported more than 134,000 customers without power at the height of the event.
- Local reporting noted that Shelby County Mayor Lee Harris issued a local state of emergency declaration after the storm left extensive outages and damaged homes, businesses, public property, and utility infrastructure.
- Publicly available storm reports indicate that residential impacts were primarily wind-related, including downed trees, damaged power infrastructure, roof, siding, gutter, utility or service-line damage, blocked residential access routes, and possible water intrusion associated with heavy rainfall.

# DAILY DART

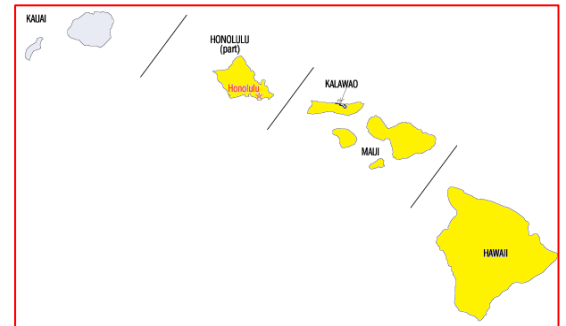

WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

- Heavy rainfall and localized flash flooding were reported as contributing impacts; however, current available damage information suggests that widespread residential flooding was not the predominant damage driver.
- On September 8, 2026, the State of Tennessee requested federal disaster assistance through FEMA's Individual Assistance and Public Assistance programs for Shelby County following the severe August storms.
- On September 11, 2026, WSP responded to a proposal request for this event. We are waiting for FEMA's decision award.

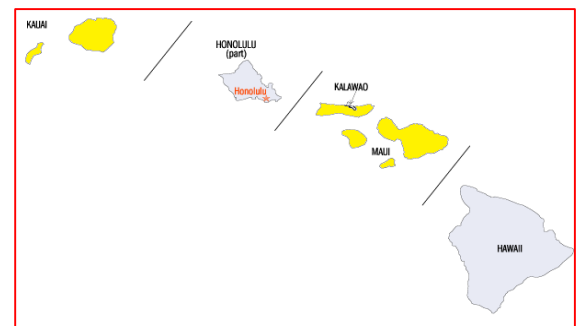

## Hawaii – Hurricane Lala

- From Aug. 14 to 16, 2026, Hurricane Lala brought severe impacts across the State of Hawai'i.
- Some areas of the State received between 20 to 40 inches of rain, which caused flooding, runoff, and landslides that had significant impacts to communities, transportation systems, utilities, and public infrastructure across the state.
- Communities in Hawai'i County's Ka'ū district sustained particularly heavy impacts. These communities are connected to the rest of the county by a single primary highway corridor, known as Highway 11, which suffered major damage from the flash flooding, mudslides, and heavy debris caused by Lala. As a result, community members were physically isolated while they lost access to electric and cellular service, fuel, groceries, and medical care. Severe slope failure at Nā'ālehu Cemetery caused the disinterment of human remains, creating an urgent public health, cultural, and operational challenge.
- Assessments of damage to residences eligible under FEMA's Individual Assistance (IA) program confirm 267 damaged residences statewide across three counties, with Hawai'i County accounting for 217 of the damaged residences.
- On September 8, 2026, Hawaii Governor Josh Green requested individual assistance for Hawaii Island, Maui Islands, and O'ahu Island.

## Hawaii – Hurricane Lowell

- Hurricane Lowell had extreme impacts on Kaua'i and Maui Counties' basic infrastructure, which left communities isolated.
- At its peak, Lowell brought gusts of 87 miles per hour in Nawiliwili and 84 miles per hour in Līhu'e.
- Rainfall reached 17 inches in Kaua'i's higher elevations, and storm surge of 2 to 4 feet impacted the south and west coasts of the islands of Kaua'i and Ni'ihau. Lowell also brought storm surge and heavy rains throughout the state.

# DAILY DART

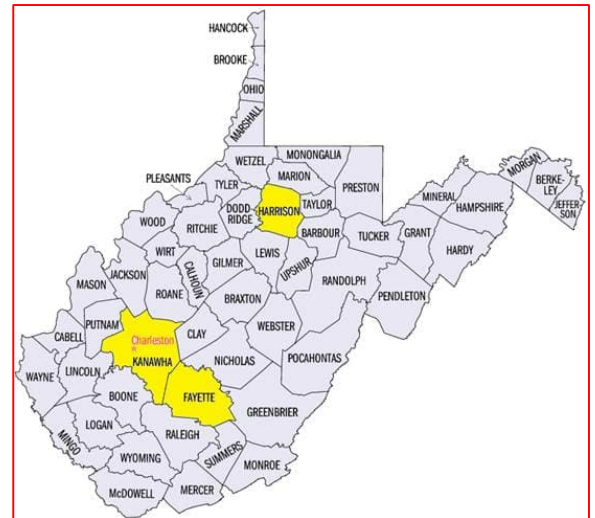

## WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 15, 2026

- The Kaua'i Island Utility Cooperative reported that approximately 90%—more than 33,000 of its 36,000 member accounts—experienced a power outage during the storm. Thousands of Kaua'i's residents still lack electricity to refrigerate their food and medications.
- At its peak, Lowell forced the closure of all of Kaua'i's commercial ports and Lihue airport, which effectively shut down external access to the island.
- Compounding these impacts, numerous roads were impassable due to fallen trees, other debris, and flooding, which isolated communities and has made it difficult for the Kaua'i Island Utility Cooperative to assess and repair damaged electrical transmission and distribution infrastructure.
- Lāna'i's Kaunapapa Harbor, the sole commercial cargo access to the island of Lāna'i, was also damaged during Lowell and is inoperable. Lāna'i's three thousand residents depend on Kaunapapa Harbor for food, fuel, medical supplies, and all construction and repair materials.
- On September 9, 2026 Hawaii Governor Josh Green requested individual assistance for Kaua'i island and Maui Island due to Hurricane Lowell.

### West Virginia

- On Sept 13, Governor Patrick Morrisey requested a Major Disaster Declaration from President Donald J. Trump for Fayette, Harrison and Kanawha counties following severe storms and flooding that struck West Virginia from August 14 through August 18.
- The request seeks federal Individual Assistance for the three counties and Hazard Mitigation Grant Program assistance statewide.
- Joint preliminary damage assessments identified 624 impacted residences across Fayette, Harrison and Kanawha counties. Of those, 22 homes were destroyed, 60 sustained major damage, 261 sustained minor damage and 281 were otherwise affected.
- Kanawha County sustained the largest concentration of residential damage, with 375 impacted homes, including 17 destroyed and 41 with major damage. Harrison County recorded 179 impacted residences, including 13 with major damage, while Fayette County recorded 70 impacted residences, including five destroyed and six with major damage.
- Preliminary estimates put total Housing Assistance and Other Needs Assistance associated with the disaster at nearly \$4.48 million. That includes approximately \$2.74 million in estimated Housing Assistance and \$1.73 million in estimated Other Needs Assistance.
- According to the National Weather Service, more than four inches of rain fell at Yeager Airport, leading to high water throughout Kanawha County. Three to six inches fell over 48 hours in Fayette County, according to the Weather Service.
