WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

September 16, 2026

Tropical Activity – Atlantic

Disturbance 1

- Located several hundred miles east of Bermuda.
- Environmental conditions could become a little more conducive for development in the next few days while the system moves slowly westward to west-northwestward over the subtropical Atlantic.
- Formation chance through 48 hours: Low (near 0%); 7 days: Low (30%)

Tropical Activity – Pacific

Disturbance 1

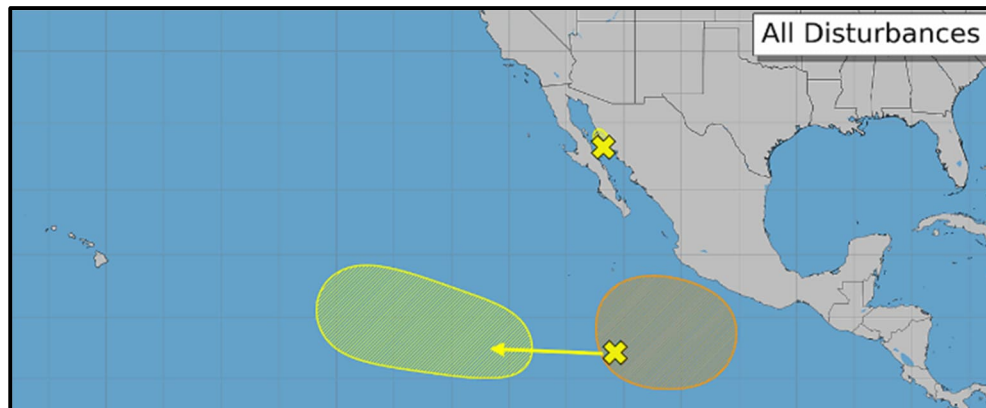

- Located over the central Gulf of California.
- Although development chances appear to be decreasing, heavy rains will likely continue across portions of the state of Sonora.
- Formation chance – 48-hour: Low (20%); 7-day: Low (20%)

Disturbance 2

- Located SW of southwestern Mexico.
- Environmental conditions appear conducive for gradual development, and this system could become a tropical depression early next week.
- Formation chance – 48-hour: Low (near 0%); 7-day: Medium (50%)

Disturbance 3

- Located well to the south of the southern tip of Baja California.
- Conditions appear conducive for some development over the weekend.
- Formation chance – 48-hour: Low (near 0%); 7-day: Low (30%)

Declaration Request Illinois

- On September 15, 2026, Governor Pritzker requested a Presidential Major Disaster Declaration from the Federal Emergency Management Agency (FEMA) for the State of Illinois following the derecho and record-breaking severe weather pattern that impacted eight counties across the state from August 11-16, 2026.
- The August 11th derecho and embedded tornadoes affected Cook and Will Counties. Damaging thunderstorms and straight-line winds across central Illinois on August 13th and repeated heavy rainfall and flash flooding from August 14-16 affected Champaign, Ford, Fulton, McLean, Tazewell, and Vermilion Counties.
- The August 11 derecho produced widespread 70–100+ mph straight-line winds and eight confirmed tornadoes across the broader NWS Chicago forecast area. Five tornado tracks intersected Cook or Will County: Wilmington EF-1; Mokena–Tinley Park EF-1; Orland Park–Hammond EF-1; Monee–Crown Point EF-2; and Glenwood–Lansing EF-1.
- From August 13–15, repeated thunderstorms produced 3–6 inches of rain across much of the Interstate 74 corridor, with localized totals of 8–12 inches. NWS identified Fulton and Tazewell Counties among the areas with rainfall having an estimated 72-hour recurrence interval near 1 in 1,000. Verified three-day totals included 11.57 inches near Tremont in Tazewell County, 10.09 inches at Canton in Fulton County, 9.00 inches near Collison in Vermilion County, 8.88 inches near Bloomington in McLean County, and 8.23 inches at Fisher in Champaign County.
- Pritzker's FEMA request covers Champaign, Cook, Ford, Fulton, McLean, Tazewell, Vermilion and Will counties.

Pending Individual Assistance Declaration Requests

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
KY*	Severe Storms, Straight-line Winds, Flooding, Landslides, and Mudslides June 17-30	7/23/26	Pending	14 Counties
